

The OS/2-eComStation News System

Robert Henschel

os2info@gmx.net

OS/2 User Group Dresden, Germany

November 17th - 19th 2006 / Warpstock Europe 2006

Outline I

- 1 Introduction
 - Why this Project
 - Community Problems?!
- 2 History
 - History of this Project
- 3 How it Works
 - Getting News
 - Submitting News
- 4 Using the News System
 - Benefits of Using the News System
 - Real World Examples
 - Remarks from Users
 - Questions

Members of the community may observe the following things:

- os2ss.com was the best news source, but it died
- Community is big enough, however free and commercial projects die because of a lack of customers/testers
- Most users don't have time to visit multiple news websites

Problems

- OS/2 and eCS community is small but there are still enough people left.
- Lots of small islands! (Roderick Klein)
- Language barriers (EN,FR,DE,RU,JP,ZH)
- Example: OS2VOICE speakup DFSee
- Example: Gomi NDIS drivers

From 2005 to today

- Original idea by Roderick Klein and Robert Henschel
- Most of website coding by Robert Henschel, contribution by Joachim Benjamins
- The website is **NOT** for end users
 - Website ecomstationnews.com offers one week old news

How to get news

- RSS newsfeed is available
- HTML export is possible (iFrame)
- ???

How to submit news

- <http://www.ecomstationnews.com/submit>
- Direct import (custom!!)
- ???

Benefits

- User Group websites with up to date news.
- Offer the news stream outside of the eCS community
- Developers commercial or free software get more feedback
- Possibly slow down or stop the decline in the number of OS/2 users

eComStationnews.com

[Submit](#) | [Search](#) | [RSS Feeds](#) | [Websites](#) | [Manage News](#) | [F.A.Q.](#)

Manage News

- [View incoming](#)
- [View approved](#)
- [Import News](#)
- [Submit News](#)

Examples

- OS2.ORG (German and English)
- BayWarp User Group (English only)
- OS/2 User Group Dresden (German only)
- ToDo: eComStation.com, netlabs.org, ...

Remarks

- Censorship -> Mensys is running it.
 - Incoming table can be **DIRECTLY** used by websites
 - All news submitted is seen by all operators
 - The more people that approve news the better
- All websites will carry the same news
 - What is the percentage of OS/2 users that visit multiple OS/2 websites?
 - A few press organizations, plenty of news on your local TV station

Questions

- You know a website or run one that wants to join! Send me an email os2info@gmx.net

Summary

- Basic setup is working, but it had a slow start
- More translators and operators needed
- Every website is welcome to join
